

To Whom It May Concern:

I am an individual with an extremely diversified professional background. My specialty is the Biological market where I have been involved in for over 20 years. My success has been driven through the ability to develop markets and bring in new growers to hand over to Distribution. I have a strong sense of setting up successful trials that establish the viability of the product in question.

I work well with a team but, have worked in positions where it was required to completely work as an individual with developing marketing materials and develop distribution for companies.

I'm looking for a career with a company where I can utilize my skills to help in the success of everyone involved.

Please feel free to call or email me if you have any questions. I look forward to your response.

Sincerely

Craig Vossler
